HOLDING STRONG SINCE 1941

It was 70 years ago when Wilton® designed the first Bullet-Design machinist vise and created the groundwork of quality craftsmanship from which the Wilton brand would rise. As it was in 1941, so it remains now. The same high level of workmanship is in every tool that bares the name Wilton®. And the rest is truly history.....

The Invention of the patented replaceable Perma-Pads allows users to replace the the pad instead of the entire clamp.

The new Tradesman Vise sets the new standard of quality and durability in vises.
